2019

Below you will find the Seventh IRG-Rail Market Monitoring report, covering data for 2017 and previous years from 29 European countries.

In the 2018 IRG-Rail report, particular emphasis has been placed on i) competition for the passenger market and ii) the incumbents' strategies to access rail passenger markets abroad.

The seventh annual market monitoring report is divided into two parts: the main report which presents over all results at the European level, and a working document in which country specific details are provided. Finally, data used to build graphics is directly available on the IRG-Rail website.

Main findings of the annual data collection cover the following areas:

- network characteristic and track access charges
- market players and global traffic
- freight and passenger markets
