

Tenth Annual Market Monitoring Report published

05.04.2022

IRG-Rail has published its Tenth Annual Market Monitoring Report. This Report covers the year 2020 and includes data from 31 European countries.

The Tenth Annual Market Monitoring report consists of two documents: the Main Report, which presents overall results at the European level and the Working Document, which provides country-specific details as well as data used to build graphics. All the documents can be found [here](#).

The Report provides an annual overview of market developments and the economic conditions in the railway sector and also enables comparison over time regarding the development and competitiveness of the railway market. Each Market Monitoring Report focuses on one or several subjects. This year, the report concentrates on the impacts of the COVID-19 pandemic on the European rail market in 2020.

IRG-Rail has been publishing Annual Market Monitoring Reports, prepared by its Market Monitoring Working Group, since 2013.
