Plenary Assembly, 18 May, IRG-RAIL approved a Position Paper regarding a Common Template for Service Facility Descriptions

IRG-RAIL APPROVED A [POSITION PAPER](#) REGARDING A COMMON TEMPLATE FOR SERVICE FACILITY DESCRIPTIONS

- More transparent access to the railway market
- The European rail market to benefit from a harmonised set of information

The Plenary Assembly of the Independent Regulators' Group - Rail has approved today a [position paper](#) regarding a Common Template for service facility description.

The common template provides specific indications for the provision of all technical information that rail service facility operators are required to supply to all railway undertakings and other economic operators for access and use of their facilities and related services.

This is a substantive step forward towards a more open, transparent and competitive European railway market for passenger and freight transport services.
